## Description

Special safe for Video Recorders (DVR/NVR).

One of the weaknesses of CCTV installations is the risk of physical access to the video recorder - it can be manipulated or stolen by intruders or unauthorised people.

The safe VR-110 is specially designed to protect video recorders whose size does not exceed 1U rack. It consists of a steel box with a 2mm thick steel door and a 4mm frame, equipped with vents located throughout the box, rear windows for wiring and various drills to anchor the safe. It is finished in epoxy-polyester paint polymerized at 180°C - very resistant.

The door lock is operated by a double 6 security-PIN key. Optionally, it can be installed inside the removable tray of VR-010 for easy access and maintenance.

The safe meets all requirements for legal regulations for the video recorders' protection.

## Scope of Delivery

Safe VR-110  
2 Keys  
User manual

## Technical Specifications
