Description

Special safe for Video Recorders (DVR/NVR).

One of the weaknesses of CCTV installations is the risk of physical access to the video recorder - it can be manipulated or stolen by intruders or unauthorized people.

The safe VR-120E is specially designed to protect video recorders which size do not exceed 1.5U / 2U rack. It consists of a steel box with a 2mm thick steel door and a 4mm frame, equipped with vents located throughout the box, rear windows for wiring and various drills to anchor the safe. It is finished in epoxy - polyester paint polymerized at 180°C - very resistant.

The door lock is operated via electronic lock, having the option to program a delayed opening (1 to 99 minutes) which is supplied with 1 battery 6LR61 (9V). Optionally, it can be installed inside the removable tray of VR-020 for easy access and maintenance.

The safe meets all requirements for legal regulations for the video recorders protection.
