Description

Rack cabinet of 19" / 6U.

The rack cabinet is designed for wall mounting and it is the perfect solution to safeguard electronic equipment, such as servers, switches, patch panel or video recorders. The standardized EIA-310 specification dimensions allows any equipment compatible with any brand or manufacturer.

Load capacity of up to 60 kg. The internal height allows host devices to complete 6U rack 19".

Additionally, includes a 120mm fan for proper cooling, an electric power strip 1U rack with 6 shots and a tray that can hold devices which are not ready for rack installation.

High resistant dual structure housing made of cold rolled steel SPCC 2.0mm thickness profiles and light plates 1.0mm for the other elements. Slotted front and side areas to optimize ventilation. Access pre-cut for the wires. The side panels are removable for easy access to the devices and have a hole to install a cylinder lock (not included).

Large front door with tempered glass display with 180° opening and cylinder lock with 2 keys (included). It is supplied disassembled and it is very easy to assembly it. It includes necessary hardware for installation of the devices in the rack.

Suitable for indoor, IP20 protection.
