<b>gDMSS Lite</b>  	<b>gDMSS Plus</b> (supports Push Alarms e.g. for motion detection)  
--	---

### For Android Tablets

<b>gDMSS HD Lite</b>  	<b>gDMSS HD</b> (supports Push Alarms e.g. for motion detection)  
---	---

- ⚙️ Connect the DVR / NVR to your broadband router, using an Ethernet cable (no phone cable!)
- ⚙️ Open the phone / tablet app, allow all requested permissions, otherwise the app may not work properly, select the country or area according to the location of your device
- ⚙️ Tab on the "Camera" symbol, 4 grey windows will appear with a "+" in the middle
- ⚙️ Tab in any of the windows, a new window "device list" will appear, tab on "Add Device" at the bottom
- ⚙️ Confirm the appearing message with "OK" and select "Wired Device"
- ⚙️ Tab on "P2P". Choose a name and then under "SN" scan the serial number of your DVR/NVR by tabbing on the QR Code Symbol or type it in directly.  
The serial number can be found on the label underneath the DVR/NVR, or in DVR user interface:  
"Main Menu -> Setting / Network -> P2P".
- ⚙️ Type in your credentials. Usually the user name should be "admin", the password is the same as for the user in the DVR/NVR. Leave the remaining settings like they are.  
Tab on "Start Live Preview" and the camera footage should appear after a few seconds
- ⚙️ When using the app the next time, tab on the symbol top right of the live preview screen (little camera), the device list will appear, highlight the circle right to your device and tab on "Start Live Preview"
- ⚙️ Please do not forget to log out of the app completely if you do not use it anymore, otherwise data may be consumed in the background.

#### Hints and Tips:

- ⚙️ In Live Preview: swipe to left / right to see next cameras
- ⚙️ Error Messages: "Failed to connect": check in the DVR/NVR under "Main Menu -> Setting / Network -> TCP/IP" that "DHCP" is turned on, in the P2P menu "Enabled" is ticked or turned on and "Status" is "Online"

For further information and downloads or if you would like to connect the DVR/NVR via wifi please visit [www.cctvdi.com/apps](http://www.cctvdi.com/apps) or call +353 1 443 3386
